

SETUP GUIDE

Autocom Diagnostic Tablet

When starting the Autocom Diagnostic Tablet for the first time, please follow the three steps below. Before you begin, make sure to plug in the charger so that the tablet is powered.

1. When starting the tablet for the first time:
 - Sign in as “Administrator” and proceed with the sign-in
 - Once the desktop appears, a pop-up window titled “System Preparation Tool 3.14” will appear. Click “OK” as shown in the image below.

The correct Out-of-Box Experience-start up process will now start (set language, username, etc.)

2. When the start-up process is done and desktop is visible:
 - Open File Explorer and go to: C:\Scripts\Icons.
 - Double click on the Windows Batch Files: “url” & “bild”
3. To be able to set the correct lock screen:
 - Please go to “Settings” → “Personalisation” → “Lock Screen”
 - In the first drop-down menu (Personalise your lock screen) please change from “Windows spotlight” to “Picture”.

The tablet is now ready to use.
