

Tool set for hub/bearing

Universal

MADE IN ITALY

Tool set for compact wheel hub/bearing unit

UNIVERSAL
FROM Ø 62 TO Ø 85 mm

HYDRAULIC CYLINDER 17 T

Complete Kit

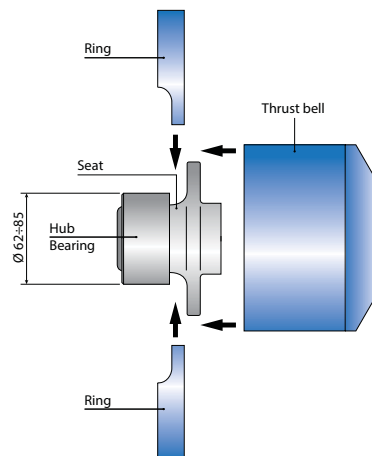

323 034 000

-  ▶ This **UNIVERSAL** Govoni kit is the solution to pull out and mount the new Hubs with new Bearing Unit HBU2 (assembled unit including hubs and bearings)
-  ▶ Thanks to its features, it can work on bearings from a diameter of Ø62 mm to Ø85 mm.
-  ▶ The main features of the kit are efficiency and fast use, endurance and heavy duty components.

The main advantages are:

- **UNIVERSAL disassembling system** (suitable to all the models)
- Use directly on the vehicle
- **Safety use** in assembling/disassembling (no break or damage of the hub)
- **it reduces working time of 25%** compared to common tools

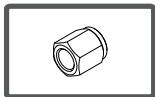

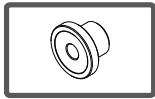

BEARINGS	BRAND
Ø 62	Audi, VW
Ø 66	Skoda
Ø 68	Citroën, Renault
Ø 72	Audi, Seat
Ø 75	Mitsubishi, Smart
Ø 78	Ford, Volvo
Ø 82	Ford, Volvo
Ø 85	4x4, SUV

Components

- 323029001** Thrust bell 
- 323029004** M20X1.5 Spindle - HEX. 15 mm 
- 323029012** Nut 
- 323029015** HEX. 30 mm thrust block bearing 

Components

- 323029012** Counterthrust nut 
- 323034007** Pushing bush Ø62 mm 
- 323034008** Pushing bush Ø66 mm 
- 323034009** Pushing bush Ø68 mm 

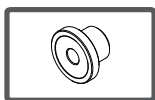

Tool set for hub/bearing

MADE IN ITALY

Components

323029020 Pushing bush Ø72 mm

323034004 Pushing ring Ø62 mm

323034003 Pushing ring Ø66, Ø68 mm

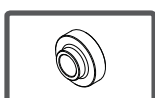

323029016 Pushing ring Ø72, Ø75, Ø78 mm

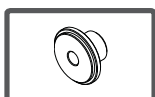

323029022 Pulling bush Ø72, Ø75, Ø78, Ø82, Ø85 mm

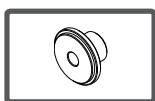

323034010 Pulling bush Ø62, Ø66, Ø68 mm

323034006 Pushing bush Ø75 mm

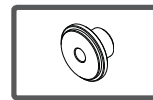

323029018 Pushing bush Ø78 mm

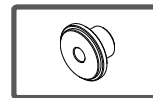

Components

323029009 Pushing bush Ø82 mm

323034005 Pushing bush Ø85 mm

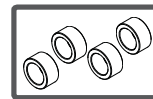

323029006 Pushing ring Ø82, Ø85 mm

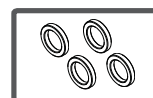

323029010 Pulling ring

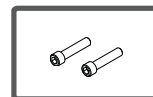

323029021 Spacers Ø 18X9

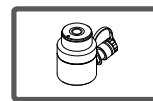

323029014 Washers Ø 18X3

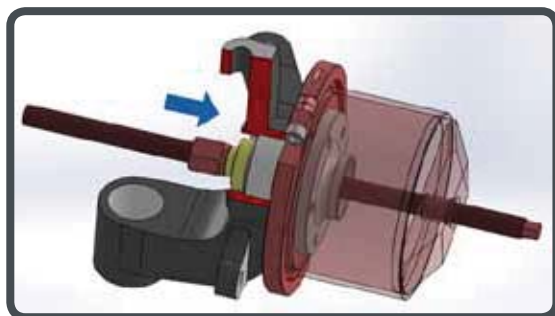

822084000 Screw M12X55

270025000 Hydraulic cylinder 17 T - Stroke 43 mm

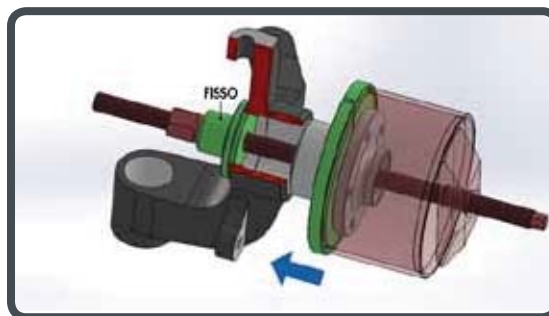

REMOVAL

Innovative system allows to settle the diameter of the pulling rings thanks to middle spacers that fits to the diameters of the bearing to remove

INSTALLATION

Pulling rings system - when closed - allows to push around the external diameter of the bearing, in the undercut granting the perfect operation of the product, avoiding the break of the hub

GO OPERATING
DIRECTLY INTO
VEHICLES
