

PRODUCT: Diagnostic device for FCA vehicles equipped with SGW

NAME: SGW Key

PRODUCT CODE: 0-67501360

As of June 2017, the FCA group has introduced the SGW Security Gateway control unit on the Fiat 500L and then on the main vehicles.

The purpose of this module is to protect the vehicle from hacker attacks by means of diagnostic instruments and/or control unit programming instruments, both through wired and wireless networks.

To date, access is allowed only to FCA instruments

PRODUCT INFORMATION

TECNOMOTOR has developed a solution to perform "Diagnoses" on all new generation FCA vehicles equipped with SGW control units

- Compliant with FCA requirements
- Compatible with all diagnosis testers of Socio-TECNOMOTOR series
- Compatible with all diagnosis testers of other brands
- Unlocking of "Logistic Mode" and "Derating" functions in new vehicles in pre-delivery
