# KAR ADAPTORS KIT

## ATF ADAPTORS KIT

cod. GEA-13.995

The KAR is a wheeled cart that is equipped with all the models of connectors.

It allows for easy and quick identification of the necessary connectors.

We have designed and manufactured a wide range of 85 connectors for automatic transmission to enable automotive repairers to quickly and easily connect equipment to the vehicle. All connectors are laser-marked for easy identification. With these **85 connectors**, you can connect to **797 models from 48 car brands**.

**Dimensions:**

W = 650 mm, H = 960 mm, D = 660 mm

**Weight:**

~60 Kgs

- Made in aluminium alloy
- Laser engraved code
- Designed for an easy use

Lato trasmissione

Al posto dello  
scambiatore di calore

Lato scambiatore  
di calore

There are different kind of way to connect the equipment to the transmission of the vehicle:

- On transmission, adaptors are connected to the transmission line and on the transmission intself.
- On heat exchanger, connection is made by disconnecting one cooler line from the exchanger and connecting adaptors one on the line and one on the heat exchanger.
- Removing heat exchanger. In this case heat exchanger is removed and replaced by the adaptor.
- Removing cartrige filter. Unscrew filter cap, remove cartrige filter and screw the adaptor.

You can find a step by step procedure on how to connect adaptors to the vehicle (i.e. where and what to disassembly to access the connection point) in our online transmission maintenance manual: Gea Idea.
